Re: Site Access Agreement for EPA/UDEQ Site Visit of Richardson Flat

Dear Mr. Osika:

This is to follow up on our telephone conversation regarding the joint EPA/UDEQ visit to Richardson Flat site on April 29, 1992. The visit will begin around 9:30 a.m. and is anticipated to last for approximately five hours. The following personnel will be conducting the site visit:

1. Harold Sandbeck, UDEQ
2. Mike Zimmerman, EPA
3. Mike McCeney, EPA
4. Rick Baird, EPA

Additionally, two contractors will accompany the EPA team. The names of both contractors will be provided to you either during or prior to the site visit.

The purpose of the site visit is to:

1. Observe the current conditions at the site.
2. Observe the condition of the site fence.
3. Determine sample locations for future sampling with emphasis on the flood plan tailings and landfill areas.
4. Observe the condition and stability of the dam.

We plan to take pictures during the site visit, however, we are not planning to take any samples at this time. We would appreciate it if you could provide us with the site access agreement.

If you have any questions, please contact Muhammad Slam of our staff at (801)536-4100.

Sincerely,

Ursula K. Trueman, CERCLA Branch Chief
Division of Environmental Response and Remediation
